-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(e). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Double Patenting*

1. Applicant is advised that should claim 2 be found allowable, claim 4 will be objected to and, should claim 3 be found allowable, claim 5 will be objected to, under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1 and 6-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 5-10 of U.S. Patent No. 6,486,231. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims encompass the claims of 6,486,231. The examples in the specification of the instant application are the same as those in 6,486,231.

### *Allowable Subject Matter*

4. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 1732

the prior art does not teach nor fairly suggest a composition which comprises at least two phases, one phase composed of a majority of component A, a semicrystalline or amorphous polymer, and the second phase is composed of a majority of component B, a polymer of a hydrophilic agent, and a majority of component C, a particle and wherein the two phases form co-continuous interconnecting channel morphology.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McAllister et al. (US Patent 5,130,342); Hatsuda et al. (US Patent 5,518,761); Fischer et al. (US Patent 5,496,397); Evans et al. (US Patent 5,494,155); Lancesseur (US Patent 5,432,214); Farrell et al. (US Patent 4,425,410); Duddy (US Patent 3,375,208).
